# TRANSMISSION FLUIDS FOR A WORLD OF CARS

Presentation

[RIDEX.EU](http://RIDEX.EU) →

# INTRODUCTION

RIDEX PLUS introduces its Automatic Transmission Fluid and Manual Transmission Fluid series. We cooperate with leading global manufacturers who utilise specially selected base oils and advanced additives processed with cutting-edge, high-tech equipment. This ensures that you obtain a high-quality product designed to meet the demands of modern vehicles and provide exceptional performance, reliability, and protection for transmission systems.

## AUTOMATIC TRANSMISSION FLUID (ATF)

Our ATFs are engineered to deliver superior performance and reliability across a wide range of vehicles. They are specifically designed to ensure smooth gear shifts, enhance hydraulic system functionality, and extend the life of your transmission. Whether you need a mineral or fully synthetic ATF, we provide solutions tailored to meet the demands of most automatic transmission, power steering, and other hydraulic systems in passenger cars and trucks.

- Smooth and precise gear shifts
- Improved hydraulic system performance
- Extended transmission lifespan

## MANUAL TRANSMISSION FLUID (MTF)

Our MTFs are carefully developed to provide unmatched durability and protection for gearboxes, steering boxes, and differentials. Available in mineral, semi-synthetic, and full synthetic formulas, the products ensure optimal performance under high pressure, as well as in extreme temperature conditions. These oils reduce wear, minimise friction, and enhance the longevity of the transmission components, making them an ideal choice for passenger cars and heavy-duty vehicles.

- Excellent wear and friction protection
- Reliable performance under high pressure
- Longevity in extreme conditions
